Main messages

- Focus is on main tables and key relationships
- Ensure adaptability and scalability
- **Objective:** ability to change tables according to the business model and market needs

TripAdvisor / Google
- Restaurant ratings

Possible queries

- What is the average age of the customers that have been members for more than a year?
- What is the most frequently searched cuisine style?
- Is there any Vietnamese restaurant in my city that serves burgers?
- List all restaurants in Eixample district of Barcelona that have a 'medium' price range and are open until 1 a.m.

Challenges

- Payments_hist table: searches + subscriptions is ok?
- Search table related to all?
- Blurry lines between developers' job and our job
